Lower Fuel Consumption

- **Reduction of fuel consumption by 11%** (Compared to the PC450-8R)
- **Advanced management system of variable engine speed matching control**
- **Fan clutch system**
- **Reduction of hydraulic piping loss**

Higher Productivity

- **Larger bucket capacity**
- **Powerful digging operation**

Durability & Reliability

- **Enhanced work equipment**
- **Newly largersized undercarriage**
- **Heavy-duty main frame and rigidity swing circle**
- **Improved engine reliability**

Lower Maintenance Cost

- **Less maintenance time with new features**
- **Detection system to prevent failure of main components**
- **More visible maintenance information on the monitor screen**

Safety & Comfort

- **Large comfortable cab**
- **Rear view monitor system (Optional)**

Information & Communication Technology (ICT) & KOMTRAX

- **Large multi-lingual high resolution Liquid Crystal Display (LCD) monitor**
- **Equipment Management Monitoring System**
- **KOMTRAX**

LOWER FUEL CONSUMPTION

KOMATSU NEW ENGINE TECHNOLOGIES

Low Fuel Consumption Technology

Engine management is enhanced. The variable speed matching of the engine, hydraulic pump and a viscous fan clutch guarantee efficiency and precision. Through the in-house development and production of main components, Komatsu has achieved great advancements in technology, providing high levels of performance and efficiency in virtually all applications.

Fuel consumption

Reduced by **11%**

vs PC450-8R
Based on typical work pattern collected via KOMTRAX. This fuel consumption data is the result that compared actual measured value by using the prototype machine.

Komatsu SAA6D125E-5 engine
EU Stage 2 emission equivalent.
(CG image)

Improvement of engine combustion efficiency

By optimizing the fuel injection control, the engine combustion efficiency is improved. This technology achieved both high power output and low fuel consumption.

Reduction of hydraulic pressure loss

The internal shape of the control valves, piping diameter and fitting shape have been thoroughly revised. With this improvement, hydraulic loss is reduced more than ever. It contributes to low fuel consumption.

Reduced fan speed and fan drive loss

A speed controlled viscous fan clutch and large diameter fan improves engine efficiency and reduces engine power requirements when operating in cooler temperatures.

Enhanced engine-pump matching control

Large displacement hydraulic main pumps provide high flow output at low engine RPM. Furthermore, by building in optimum matching of the engine and pumps, it keeps high operability and workability. This technology achieved a large production and low fuel consumption.

Assists Energy-saving Operations

ECO gauge

Equipped with the ECO gauge that can be recognized at a glance on the right of the multi-function color monitor for environment-friendly energy-saving operations. Allows focus on operation in the green range with reduced CO₂ emissions and efficient fuel consumption.

ECO gauge

Idling caution

Idling caution

To prevent unnecessary fuel consumption, an idling caution is displayed on the monitor, if the engine idles for 5 minutes or more.

Auto idle stop function

When the engine has been idling for certain time, the engine stops automatically to reduce unnecessary fuel consumption and exhaust emissions. The duration before the engine shutdown can be easily programmed.

Fuel Saving Support Functions

Just select a working mode that suits your purpose

In P mode, LARGE PRODUCTION is implemented. In E mode, LOW FUEL CONSUMPTION is implemented. E mode can be adjusted widely from E0 to E3 mode, and it adapts flexibly to customer's demands. Komatsu tuned each working mode precisely, ensuring high operability and workability. Just by selecting the working mode, it provides the best performance in demanding applications.

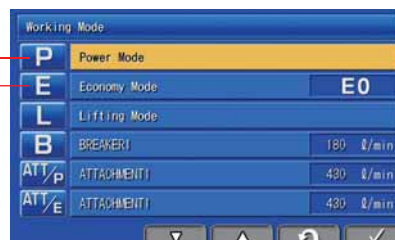

P (Power mode):

Maximum production
Fast cycle time

E (Economy mode):

Better fuel consumption

Easy selectable E mode

Compared with the conventional model, E0 to E3 can be easily selected on the monitor.

In addition to the above modes there are also the following modes. Please select the appropriate mode according to the application.

Working Mode	Application	Advantages
L	Lifting mode	<ul style="list-style-type: none"> Suitable attachment speed Lifting capacity is increased 7% by raising hydraulic pressure.
B	Breaker mode	<ul style="list-style-type: none"> Optimum engine rpm, hydraulic flow
ATT/P	Attachment Power mode	<ul style="list-style-type: none"> Optimum engine rpm, hydraulic flow, 2way Power mode
ATT/E	Attachment Economy mode	<ul style="list-style-type: none"> Optimum engine rpm, hydraulic flow, 2way Economy mode

Two-mode Setting for Boom

Smooth mode provides easy operation for gathering blasted rock or scraping down operation. When maximum digging force is needed, switch to Power mode for more effective excavating.

Boom floats upward, reducing lifting of machine front. This facilitates gathering blasted rock and scraping down operations.

Boom pushing force is increased, ditch digging and box digging operation on hard ground are improved.

Smooth Loading Operation

Two return hoses improve hydraulic performance. In the arm out function, a portion of the oil is returned directly to the tank providing smooth operation.

HIGHER PRODUCTIVITY

Increase Productivity

Productivity with t/L is improved by large bucket capacity and upgrading basic performance. It improves productivity and economical performance.

Fuel efficiency (t/L)

21% increase

vs PC450-8R
P mode (90° swing and loading onto truck)

Large capacity buckets

Bucket selection up to 3.10 m³ are available. It can be matched for various applications.

Bucket capacity

2.50 m³ & 3.10 m³

(Allowed material density: 1.8 t/m³)

(Allowed material density: 1.5 t/m³)

7060 mm boom and 3380 mm arm

2.50 m³ HD bucket & 3.10 m³ GP bucket

By optimizing the shape of the side edge, it increases the penetration force.

Powerful digging operation

Digging in P mode became powerful by improving hydraulic control. When more power is needed, the engine output is powered up by the one-touch power max. function (See next article), and you can dig stronger. Increasing engine power achieved high performance.

Engine horsepower Compared to the PC450-8R

5% up (269 kW ◀ 257 kW)

Bucket digging force Compared to the PC450-8R

9% up (303 kN ◀ 277 kN)

One-touch power max. function

Digging force increase for 8.5 seconds of operation when press the left knob switch which is called the one-touch power max. switch.

One-touch
power max. switch

Maximum arm crowd force (ISO 6015)

7% up (235 kN [24.0 t] ◀ 219 kN [22.3 t])
(With power max. function)

Maximum bucket digging force (ISO 6015)

7% up (303 kN [30.9 t] ◀ 283 kN [28.9 t])
(With power max. function)

Measured with power max. function, 3380 mm arm and ISO 6015

DURABILITY & RELIABILITY

High Durability for 50-ton Class Excavator

Whole structure of PC500LC-10R is completely renewed on the assumption of severer jobsites. Durability and reliability are greatly improved.

New reinforced working equipment with excellent durability and reliability

Remodeled new reinforced working equipment to adapt larger size bucket. It is much suitable for severe condition working. The newly designed working equipment achieve high durability and reliability with high performance.

Optimizes shape of casting

The shapes of the cast parts exposed to high loads are optimized for higher durability and reliability.

Wide boom and arm

Rigidity is increased by increasing the working equipment size. The newly developed working equipment resists twisting and bending well.

* It is not interchangeable to PC450-8R, due to upsize width of working equipment.

New reinforced undercarriage

Newly largersized undercarriage adopts as standard. Durability and reliability are significantly improved by reinforcing and increasing the size of all components.

Improve Engine Reliability

Total reliability for engine is improved by new water cooled turbo and new injector. It is more reliable than current model.

O-ring Face Seal

The hydraulic hose seal method has been changed from a conventional taper seal to an O-ring seal. This provides improved sealing performance.

Metal Guard Rings

Metal guard rings protect all the hydraulic cylinders and improve reliability.

Fuel Pre-filter

(With water separator)

Removes water and contaminants from fuel to enhance the fuel system reliability.

Shield Connectors

Shield connectors seal tight and have higher reliability.

LOWER MAINTENANCE COST

**Maintenance is Also Part of the Operating Cost.
Komatsu Pursued Reduction of Maintenance Time and Cost.**

Centralized filters

It is easy to access all filters. All filter cartridges are located at pump room. It can reduce time of periodical maintenance.

PC500LC-10R

Easy cleaning cooling unit

Cleanability of the cooling unit has been improved. It is effective in the field of dusty site.

- Improvement core cleanability by enabling openable engine hood side cover
- Making oil cooler a single piece from 3 pieces, no more space accumulating dust

Easy oil sampling (Optional)

Easy oil sampling ports are added. It is important to get sample that is agitated properly. Using this equipment will help accurate analysis.

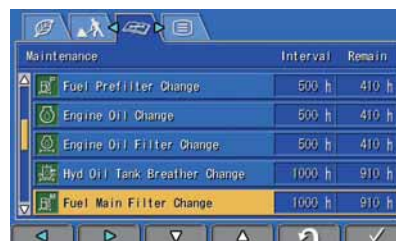

Auto tension fan belt

Belt tension for cooling fan and compressor and alternator are adjusted automatically.

Easy maintenance time management

The monitor informs replacement time of oil and filters on the LCD when the replacement interval is reached.

Easy to know maintenance time when using breaker

In addition to the above functions, it monitors the breaker usage time. Since the replacement time will be changed depending on the breaker usage time, monitor can notify the optimum replacement time.

Detect abnormality of hydraulic circuit
Clogging sensor for hydraulic oil as standard

When the hydraulic oil filter is clogged, the caution message pops up on the monitor to notify replacing the filter. It is possible to suppress repair cost due to breakdown.

Clogging hydraulic oil filter caution

Clogging sensor for breaker line (Optional)

Battery disconnect switch

A battery disconnect switch allows a technician to disconnect the power supply and lock out before servicing or maintenance the machine. Also, minimize discharge of the battery during long-term non operation. System operating lamp tells the timing of disconnect the switch to prevent controller failures.

Pre-cleaner for dusty condition

Even in dusty places, by installing pre-cleaner coupled with the large air cleaner, the frequency of cleaning the air cleaner will be reduced.

Other Features

Easy to check level of hydraulic oil

Electric priming pump

Blow-by pressure detection

SAFETY & COMFORT

Ensuring Operator's Comfort, It Contributes to Increase Safety and Productivity.

Wide newly-designed cab

Newly-designed wide spacious cab includes seat with reclining back-rest. The seat height and longitudinal inclination are easily adjusted using a pull-up lever. You can set the appropriate operational posture of armrest together with the console. Reclining the seat further enables you to place it into the fully flat state with the headrest attached.

New adjustable armrest without tools

The height of the armrest is quickly and easily adjusted without tools.

Pressurized cab

Pressurizing inside the cab to minimize the dust entering from outside. It can keep cab clean.

Low cab noise

With overwhelming low noise, you can operate without stress. Ambient noise is also reduced, reducing the stress of surrounding workers.

Low vibration with cab damper mounting

The cab damper mounting combined with high rigidity deck aids vibration reduction at operator seat.

Suspension seat

Suspension seat with weight adjustment function as standard equipment. This seat can reduce fatigue even in operation for a long time.

Automatic air conditioner (A/C)

It adjusts automatically to a comfortable temperature throughout the year, even in hot and cold areas.

Sun roller blind

Prepared a roller blind which blocks strong sunlight. Reduce sunlight at any time of day.

Lock lever auto lock function

If the work equipment lever is not in the neutral position when the hydraulic lock lever is released, the equipment is automatically stopped. The auto stop state is shown on the monitor screen.

Lock lever

Locks the hydraulic pressure to prevent unintentional movement. Neutral start function allows machine to be started only in lock position.

Engine shutdown secondary switch

Engine stop switch added for emergency use.

Seat belt caution indicator

Hand rails prevent accidental fall-off

Large serrated steps

Rear view monitor system (Optional)

The operator can view the rear of the machine with a color monitor screen.

Rear view image on monitor

Fan guards

Fan guards are placed around fan drive.

Pump/engine room partition

Pump/engine room partition prevents oil from spraying onto the engine if a hydraulic hose should fail.

AUX

12 V power supply

Magazine box

Cool & hot box

Luggage box

LARGE HIGH RESOLUTION LCD MONITOR

Large Multi-lingual High Resolution LCD Monitor

A large user-friendly high resolution LCD color monitor enables safe, accurate and smooth work. Simple and easy to operate switches. Function keys facilitate multi-function operations. Displays data in 15 languages to globally support operators around the world.

Indicators

- | | |

Supports Efficient Operation

The main screen displays advices for promoting energy-saving operations as needed. The operator can use the ECO guidance menu to check the operation records, ECO guidance records, average fuel consumption logs, etc.

ECO guidance

ECO guidance menu

ECO guidance records

Operation records

Average fuel consumption logs

Simplified Selection of Languages and New Languages added.

It supports 15 languages including newly added languages. Language selection has become extremely easy.

Equipment Management Monitoring System

Monitor function

Controller monitors engine oil level, coolant temperature, battery charge air clogging, etc. If the controller finds any abnormality, it is displayed on the LCD.

Maintenance function

The monitor informs replacement time of oil and filters on the LCD when the replacement interval is reached.

Trouble data memory function

Monitor stores abnormalities for effective troubleshooting.

KOMTRAX

The Komatsu remote monitoring and management technology provides insightful data about your equipment and fleet in user-friendly format.

Energy Saving Operation Report

KOMTRAX delivers the energy-saving operation report based on the operating information such as fuel consumption, load summary and idling time, which helps you efficiently run a business.

This report image is an example of hydraulic excavator

Equipment Management Support

Through the web application, a variety of search parameters are available to quickly find information about specific machines based on key factors. Moreover, KOMTRAX finds out machines with problems from your fleet and shows you through an optimal interface.

Location

Working status

Periodic maintenance

The report contents and data depend on the machine model.

Optimal Strategy for Efficient Work

The detailed information that KOMTRAX puts at your fingertips helps you manage your fleet conveniently on the web anytime, anywhere. It gives you the power to make better daily and long-term strategic decisions.

SPECIAL SPEC.

Attachment Spec.

Equips PC500LC-10R for breaker and crusher installation. Hydraulic flow rate can be regulated by setting breaker mode on monitor panel for breaker operation.

Pilot filter

Inline filter

Stop valve

Additional filter for breaker with clogging sensor

Accumulator

SE Spec. (Optional)

Increased productivity by new SE boom and large capacity buckets. It improves the efficiency of loading to dump truck with large amount of loose material such as blasted rock.

Bucket capacity for 2.4 m SE arm

BUCKET

Feature of Komatsu Bucket

The bucket affects most of the digging work and fuel consumption. Komatsu has line-up of various buckets so that you can choose a bucket suitable for your jobsite condition. You can also choose a bucket made by HENSLEY as one of the options. Please contact your dealer.

New Shape Bucket

Easy to Make Bucket Full and Good Penetration

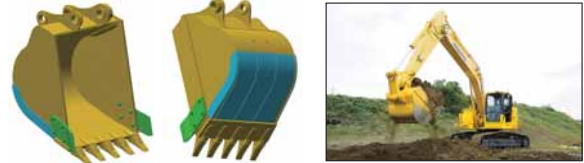

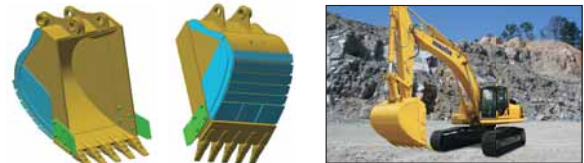

The angle to the deepest part of the bucket becomes smooth with respect to the direction of excavation and the penetration resistance decreases by new shape of side edge.

Sharp edge to increase penetration

Smooth scoop by reducing resistance

Category and Feature

Category	Load / Wear / Soil (Application)	Image
Light Duty LD	Load Machine power remains low during the majority of the work. No impact load. Wear Material is not abrasive. Soil Dirt, loam and clay.	
General Purpose GP	Load Machine power is mostly medium, but occasionally high. Bucket movements are smooth with minor shock load. Bucket penetrates easily. Wear Material is lightly abrasive. Some sand may be medium abrasive. Soil Mostly loose sand, gravel and finely broken materials.	
Heavy Duty HD	Load Machine power is high during majority of the work. Medium, but continuous shock load. Wear Material is abrasive. Light scratch marks can be seen at the bucket. Soil Limestone, shot rock, compact mix of sand, gravel and clay.	
Extra Heavy Duty XHD	Load Machine power is high during most of the work, often at maximum. Dynamic shock loads are frequent and machine may shake. Wear Material is very abrasive. Large scratch marks are visible and, or deform metal. Works within heaps of rock with occasional un-shot rock and rock boulders. Soil Granite, basalt, quartz sand, compact and sticky clay.

KOMATSU TOTAL SUPPORT

Komatsu Total Support

Komatsu Distributer is ready to provide variety of support before and after procuring machine to keep customers machine available and minimize operation cost.

Fleet recommendation

Komatsu Distributer can study customer job site and provide the most optimum fleet recommendation with detailed information to meet all of your application needs when you are considering to buy new machines or to replace the existing ones from Komatsu.

Product support

Komatsu Distributer secure the quality of machine by offering quality repair and maintenance services to the customer using Komatsu developed programs.

- Preventive Maintenance (PM) Clinic
- Komatsu Oil and Wear Analysis (KOWA)
- Undercarriage inspection service, etc.

Genuine parts and genuine oil

Komatsu Distributer will promptly and smoothly offer genuine parts and genuine oil guaranteed quality to various jobsites. Genuine oil is developed by Komatsu so that it is best matched for our Komatsu engines and hydraulic components. It maximizes engine and hydraulic components performance and prolong life.

Service contract

Komatsu Distributer offers several service package of repair and maintenance for a contracted period with optimum cost. Customer can be "worry-free" by trusting Komatsu Distributer skilled service.

Operator training

Komatsu Distributer can provide excellent operator training which enables them to operate machine safely & efficiently and to maintain machine properly.

SPECIFICATIONS

ENGINE

EU Stage 2 emission equivalent.

Model Komatsu SAA6D125E-5
 Type Water-cooled, 4-cycle, direct injection
 Aspiration Turbocharged, aftercooled
 Number of cylinders 6
 Bore/stroke 125 mm/150 mm
 Piston displacement 11.04 L
 Horsepower:
 SAE J1995 Gross 270 kW 362 HP
 ISO 9249 / SAE J1349 Net 269 kW 360 HP
 Rated rpm 1900 min⁻¹
 Fan drive method for radiator cooling Mechanical with viscous fan clutch
 Governor All-speed control, electronic

HYDRAULICS

Type HydraMind (Hydraulic Mechanical Intelligence New Design) system, closed-center system with load sensing valves and pressure compensated valves
 Number of selectable working modes 6
 Main pump:
 Type Variable displacement piston type
 Pumps for Boom, arm, bucket, swing, and travel circuits
 Maximum flow 690 L/min
 Supply for control circuit Self-reducing valve
 Hydraulic motors:
 Travel 2 x axial piston motors with parking brake
 Swing 1 x axial piston motor with swing holding brake
 Relief valve setting:
 Implement circuits 37.3 MPa 380 kgf/cm²
 Travel circuit 37.3 MPa 380 kgf/cm²
 Swing circuit 27.9 MPa 285 kgf/cm²
 Pilot circuit 3.2 MPa 33 kgf/cm²
 Hydraulic cylinders (Number of cylinders – bore x stroke x rod diameter) :
 Boom 2–170 mm x 1570 mm x 115 mm
 Arm
 Std 1–185 mm x 1985 mm x 130 mm
 SE 1–185 mm x 1800 mm x 130 mm
 Bucket
 Std 1–160 mm x 1450 mm x 115 mm
 SE 1–185 mm x 1350 mm x 130 mm

DRIVES AND BRAKES

Steering control Two levers with pedals
 Drive method Hydrostatic
 Maximum drawbar pull 329 kN 33550 kg
 Gradeability 70%, 35°
 Maximum travel speed: High 5.5 km/h
 (Auto-shift) Mid 4.2 km/h
 (Auto-shift) Low 3.0 km/h
 Service brake/parking brake Hydraulic lock/mechanical disc brake

SWING SYSTEM

Drive method Hydrostatic
 Swing reduction Planetary gear
 Swing circle lubrication Grease-bathed
 Service brake Hydraulic lock
 Holding brake/Swing lock Mechanical disc brake
 Swing speed 9.1 min⁻¹

UNDERCARRIAGE

Center frame X-frame
 Track frame Box-section
 Seal of track Sealed track
 Track adjuster Hydraulic
 Number of shoes (Each side) 49
 Number of carrier rollers (Each side) 2
 Number of track rollers (Each side) 8

COOLANT AND LUBRICANT CAPACITY (REFILLING)

Fuel tank 640 L
 Coolant 45.0 L
 Engine 37.0 L
 Final drive (Each side) 9.0 L
 Swing drive 17.0 L
 Hydraulic tank 279 L

Major Component Weights

Items		Weight for a Machine (kg)
Boom (Incl. Piping, Pins, Arm Cylinder)	7.1 m	4480
	6.7 m	4410
Arm (Incl. Piping, Pins, Bucket Cylinder)	3.4 m	2740
	2.9 m	3000
	2.4 m	2660
Bucket (Without Linkage)	4.0 m ³ GP	2520
	3.7 m ³ GP	2390
	3.5 m ³ HD	2720
	3.1 m ³ GP	2310
	3.0 m ³ HD	2530
	2.5 m ³ HD	2410
Counterweight		10740
Undercarriage	LC	6560
Shoe Assembly (With Link)	600 mm Triple Grouser Shoes	5240
	700 mm Triple Grouser Shoes	5740
	800 mm Triple Grouser Shoes	6240
	900 mm Triple Grouser Shoes	6730
	600 mm Double Grouser Shoes	5360

Standard Specification:

Operating weight: PC500LC-10R: 49500 kg

Operating weight including below spec.

Boom: 7060 mm STD

Arm: 3380 mm STD

Bucket: 2.5 m³ GP

Shoe: 600 mm triple grouser

Rated capacity of lubricants, coolant, full fuel tank, 80 kg operator.

STANDARD EQUIPMENT

ENGINE

- Air pre-cleaner
- Automatic engine warm-up system
- Compliant bio diesel fuel
- Coolant filter
- Dry type air cleaner, double element
- Electric priming pump
- Engine, Komatsu SAA6D125E-5
- Engine overheat prevention system
- Fan clutch
- Fuel pre-filter (With water separator)
- Radiator and oil cooler dust proof net

ELECTRICAL SYSTEM

- Alternator, 24 V/60 A brushless
- Auto-decelerator
- Batteries, 2 X 12 V/140 Ah
- Battery disconnect switch with operation lamp
- Electric horn
- Starting motor, 24 V/11 kW
- Working light, 4 (Boom, RH and 2 on cab)

HYDRAULIC SYSTEM

- Arm holding valve
- Boom holding valve
- Clogging sensor for hydraulic oil return filter
- Inline filter
- Pilot filter
- Power maximizing system
- Pressure Proportional Control (PPC) hydraulic control system
- Two-mode setting for boom
- Working mode selection system

GUARDS AND COVERS

- Fan guard structure
- Heavy duty revolving frame undercover
- Revolving frame deck guard
- Track roller guards (Full length)

UNDERCARRIAGE

- Hydraulic track adjusters (Each side)
- Track frame undercover
- Track roller
 - 8 each side
- Track shoe
 - 600 mm triple grouser

OPERATOR ENVIRONMENT
