WALK-AROUND

The Komatsu S6D125E-2 diesel engine

provides an output of **149 kW** 200 HP with excellent productivity.

Left hand **joystick** controls all tractor motion. Right hand joystick controls all blade movements.

Gull-wing engine side covers for easy and safer servicing. (optional)

High capacity **Straight tilt dozer** combined the highest power in its class with outstanding productivity.

Blade tilt lines completely protected.

Komatsu Torqflow transmission

offers single lever control of speed (3 forward and 3 reverse) and directional changes.

Forward mounted **pivot shafts** isolate final drives from blade loads.

Electronic monitoring system prevents minor problems from developing into major ones. (optional)

Optional hexagonal, low noise cab with viscous damping mounts provides unsurpassed operator comfort and visibility.

OPERATOR'S COMPARTMENT

All steering, direction, and speed changes are made by a left-hand single joystick control. If the operator wants to move the machine forward and to the left, he simply moves the joystick forward and to the left. If he desires a gear change, he merely twists his wrist. The machine responds to the movement of the lever providing the operator with the feeling of natural control with Komatsu's joystick.

Low-noise design

For smoother riding comfort, power train components and hydraulic control valves are mounted to the frame with rubber pads to soften vibration and shut out noise. Since the D85ESS employs joysticks, the walk-through operator compartment is uncluttered for smooth entry and exit. An adjustable seat with backrest is standard equipment.

Three-stage height adjustable armrests

Three-stage height adjustable armrests and relocated fuel control lever provide comfortable operation and increased leg space.

Hexagonal pressurized cab (optional)

Air filters and a higher internal air pressure combine to prevent external dust from entering the cab. In addition, the cab's hexagonal design provides excellent front, side, and rear visibility. The viscous damper cab suspension softens shocks for operator comfort and extends component life.

Easy-to-operate work equipment control lever

With the Closed-center Load Sensing (CLSS) hydraulic system, blade lever stroke is directly proportional with blade speed, regardless of the load and travel speed. This results in superb, fine controllability.

Benefits of CLSS

- More precise and responsive operation due to the pressure compensation valve.
- Reduced fuel consumption by discharging only the required amount of oil from the pump.
- The work equipment moves smoothly for operations such as side-cutting even when priority is given to steering.

CLSS for D85ESS-2A

Electronic monitoring system (optional)

An electronic monitoring system prevents minor problems from developing into major ones. All meters and gauges are controlled by a microcomputer, which provides a wide indication range for an easier, more precise reading.

RELIABILITY FEATURES

Field-proven engine

Powerful S6D125E-2 diesel engine provides a massive output of **149 kW** 200 HP. The engine power is transmitted smoothly to the final drives via a high-efficiency torque converter.

Modular designed power train units

The modular design allows easy removal and installation of any individual unit for shorter downtime.

Flat bottom frame

A **flat bottom frame**, the monocoque track frames and forward-mounted pivot shafts provide good maneuverability in muddy terrain by preventing mud from building up under the frame.

Sturdy design

Because fewer components mean greater reliability, we've designed a simple hull frame made of a thick, single plate. Track frames have a large-section construction for maximum rigidity. Even the box-section construction of the blade back beam is reinforced, all with durability in mind.

Tough undercarriage

Large-diameter bushings, increased track link heights, and improved oil-seals help to increase undercarriage durability. Serviceability has also been improved with the addition of remote greasing of the equalizer bar center pin.

Low drive and long track undercarriage

Komatsu's design is extraordinarily tough and offers excellent grading ability and stability.

EASY MAINTENANCE

Wet, multiple-disc brakes

Eliminate brake-band adjustments for maintenance-free operation.

Coolant reservoir

A radiator coolant reservoir makes it easier to check the coolant level and eliminates frequent refilling.

Oil pressure check ports (optional)

Oil pressure check ports for the power train are centralized on the right hand side of the operator platform for easy access.

Gull-wing engine side covers (optional)

A gas-spring cylinder opens the gull-wing engine side covers widely, allowing the engine and auxiliary components to be easily checked.

TORQFLOW TRANSMISSION

Komatsu's TORQFLOW transmission consists of a water-cooled, 3-element, 1-stage, 1-phase torque converter and a planetary gear, multiple-disc clutch transmission which is hydraulically actuated and force-lubricated for optimum heat dissipation. Joystick control of gears (3 forward and 3 reverse) and directional steering changes. Gearshift lock lever and neutral safety switch prevent machine from accidental starts.

Travel speed	Forward	Reverse
1st	0-3.9 km/h 0-2.4 mph	0-5.0 km/h 0-3.1 mph
2nd	0-6.8 km/h 0-4.2 mph	0-8.6 km/h 0-5.3 mph
3rd	0-10.6 km/h 0-6.6 mph	0-13.4 km/h 0-8.3 mph

FINAL DRIVES

Double-reduction final drives of spur gear and planetary gears to minimize transmission of shocks to power train components. Segmented sprocket are bolt-on for easy in-the-field replacement.

STEERING SYSTEM

Joystick controls for all directional movements. Pushing the joystick forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the joystick to the left to make a left turn. Tilt it to the right for a right turn.

Wet, multiple-disc steering clutches are hydraulically loaded and hydraulically released. Wet, multiple-disc brakes are spring-actuated and hydraulically released.

Steering brakes also function as service and parking brakes.

Minimum turning radius*: **3.4 m** 11'2"

*As measured by track marks on ground.

UNDERCARRIAGE

Suspension Oscillation with equalizer bar and forward mounted pivot shafts

Track roller frame Monocoque, large section, durable construction

Track shoes Lubricated tracks. Unique dust seals for preventing entry of foreign abrasives into pin-to-bushing clearances for extended service.

Track tension is easily adjusted with a grease gun.

STANDARD EQUIPMENT FOR BASE MACHINE

- Air cleaner, double element with dust indicator
- Alternator, 35 ampere/24V
- Batteries, 140 Ah/2 x 12V
- Blower cooling fan
- Decelerator pedal
- Engine hood
- Fenders
- Lighting system, (includes 2 front, 1 rear)
- Mono-lever steering
- Muffler with curved exhaust pipe
- Radiator guard door, flat
- Radiator reserve tank
- Rear cover
- ROPS mounting brackets
- Starting motor, 7.5 kW/24V
- Seat, adjustable
- Track roller guard, end sections
- Track shoe assembly
 - Sealed and lubricated track
 - **510 mm 20"** single grouser shoe
- Underguards, oil pan and transmission
- Wet, multiple-disc steering clutch/brake

OPTIONAL EQUIPMENT

- Air conditioner
- Backup alarm
- Cab
- Cab accessories
 - Cup holder
 - Rear view mirror
- Cooling fan, reversible
- Electronic instrument monitor panel
- Engine side covers, gull-wing
- Front pull hook
- Heater and defroster
- Hitch type drawbar
- High mount foot rests
- Hydraulics for ripper
- Hydraulics for tilt dozer
- Intake pipe with precleaner
- Light working, cab additional
- Locks, filler caps and covers
- Pressure check ports for power train
- Radiator core protective grid
- Rigid type drawbar
- ROPS canopy
- ROPS canopy with sweep
- Seat belt, retractable
- Suspension seat, with high-back
- Suspension seat, reclining with fabric material (cab only)
- Track roller guard, full length
- Underguard, heavy-duty
- Vandalism protection cover for instrument panel
- Water separator

ROPS CANOPY

- Additional weight **420 kg** 930 lb
- Meets ISO 3471 and SAE J1040 APR88, ROPS standards, and ISO 3449 FOPS standard.
- Roof dimensions:
 - Length: **1830 mm** 6'0"
 - Width: **1600 mm** 5'3"
 - Height from operator compartment floor: **1700 mm** 5'7"

STEEL CAB

- Additional weight **285 kg** 630 lb
- All-weather, enclosed pressurized cab
- Dimensions:
 - Length: **1765 mm** 5'9"
 - Width: **1720 mm** 5'8"
 - Height: **1625 mm** 5'4"
 - Height from floor to ceiling: **1515 mm** 5'0"

MULTI-SHANK RIPPER

- Additional weight (including hydraulic control unit): **1680 kg** 3,700 lb
- Beam length: **2170 mm** 7'1"
- Maximum digging depth: **595 mm** 1'11"
- Maximum lift above ground: **640 mm** 2'1"

ROPS CANOPY FOR CAB

- Additional weight **340 kg** 750 lb
- Meets ISO 3471 and SAE J1040 APR88, ROPS standards, and ISO 3449 FOPS standard.
- Roof dimensions:
 - Length: **1270 mm** 4'2"
 - Width: **1490 mm** 4'11"
 - Height from operator compartment floor: **1705 mm** 5'7"
